Address Syria, Damascus

Hardworking and competent web developer. I have good skills in developing attractive and robust web applications.

Skills

Backend Development: I have developed many websites with Django framework with strong experience with it, also I have developed in Next.js framework. I have done many projects like Ecommerce, Blog, Project Management, Academy websites, Booking travels and much more.

Frontend Development: I have implemented a lot of frontend projects using many frameworks like React.js, Angular, Tailwindcss, MaterialUI and Angular material. Also, I have handled fetching data with RestAPIs and GraphQL.

Problem Solving: I have faced many problems in my career but in the end I fix all of them whether technical errors problems or practical problems in real projects.

Teaching Ability: One of my best skills is loving to teaching others especially what I love, and I has a lot of power for teaching and guiding others in programming field.

Exploiting the Power of AI: I use AI in my coding to boost productivity, automate repetitive tasks, and speed up development with smart code generation.

Achievements

- I developed a custom Angular library that dramatically improve both developer productivity and runtime performance across multiple applications, it has boosted the runtime and compile time up to 3-10x faster.
- I have been promoted to Senior Developer in my first company in just 1.5 years based on demonstrated technical abilities, leadership skills, and consistent high-quality work.

Experiences

2024-2025

[Tatweer LLC](#)

At this company, I worked in large scale applications that empower major facilities (governmental and non-governmental).

Projects
